

Synthetic Evaluation Report

Date: 2026-06-09T04:34:01.014611 UTC

Executive Summary

This synthetic evaluation of 100 tickets shows an overall accuracy of 71.00%, micro-F1 71.00%, and macro-F1 70.79%. Average pipeline latency per ticket was 0.129 seconds and the observed deflection rate was 0.00%. Estimated per-ticket processing cost is INR 0.032 (3.2 paisa), based on an assumed nominal compute cost of USD 0.0030/sec. Primary strengths: high precision for Storage and SecOps categories; areas for improvement: Software and Network routing recall. Recommendation: improve training/examples for Software/Network use-cases, and consider tuned keyword fallbacks or RAG growth for low-grounding categories to increase recall.

Total synthetic tickets: 100
Accuracy: 0.7100
Micro F1: 0.7100
Macro F1: 0.7079
Deflection Rate: 0.0000
Average latency (s): 0.1287
Estimated cost per ticket: INR 0.032 (3.2 paisa)

Metric	Value
Total tickets	100
Correct	71
Accuracy	0.7100
Micro F1	0.7100
Macro F1	0.7079
Deflection Rate	0.0000
Avg Latency (s)	0.1287
Estimated cost per ticket (INR)	0.032
Estimated cost per ticket (paisa)	3.2

Per-department performance

Department	Count	Precision	Recall	F1
DBA	15	0.8462	0.7333	0.7857
Hardware	15	0.7692	0.6667	0.7143
Identity	15	0.6842	0.8667	0.7647

Network	10	0.7143	0.5000	0.5882
SecOps	15	0.8750	0.4667	0.6087
Software	15	0.4643	0.8667	0.6047
Storage	15	1.0000	0.8000	0.8889
